- On-Site
- Off-Site
- On-site / Off-site
- Offshore Development Centre (ODC Support Services)

# Qatalys Healthcare IT – Areas of Expertise

## 1. Quality of Care

We help provide high quality care to Medicare patients and simultaneously reduce healthcare spending by assuring that correct information about the patient is shared at the right time among ACO stakeholders.

## 2. Business Intelligence & Analytics

Our challenge is extraction of the correct information to get the broadest picture of an organization, in order to support correct decision-making at key times, saving money and minimizing errors.

## 3. Product Engineering

Our strong healthcare IT and enterprise IT background make us a key partner in engineering your healthcare IT systems, starting at conceptualization and running through retirement.

## 4. Compliance

Our strong healthcare background and proven experience in achieving compliance for our customers make us an expert and reliable partner to help achieve compliance goals.

## 5. Integration & Interoperability

Industry standard methodologies such as HL7 and EDI have helped us deliver quality cost effective integration solutions to our customers.

## 6. Mobile Application Development

We have been enabling mobile-based, full-scale enterprise healthcare systems for various entities in the industry.

# Qatalys - Select Healthcare IT clients

# Qatalys Enterprise IT – Focus Areas

## Infrastructure Management

We offer range of Remote Infrastructure Management Services (RIMS) that include Network Management. Our extensive engagements with RIMS have lead us to implement QScan, an asset management tool that we use to conduct RIMS. QScan is a multi-threaded IP, NetBIOS, and SNMP scanner with an interface.

## Mobile Application Development

Our Mobile Application competency is displayed from our extensive portfolio of commercial projects for mobile platforms, and from our innovative research activities executed in our Mobile Lab.

## Enterprise Application Services

Our vast experience in product design allows us to ask the right questions at the onset of product development, and to identify those factors that will have the greatest bearing on the total cost of bringing products to market.

## Quality Engineering Services

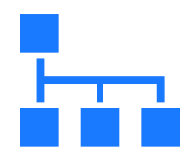

Independent Testing and Quality Assurance of software is high on the agenda of all IT and Software Product Managers.
